## Azure 103, Module 6, Hands On - 3

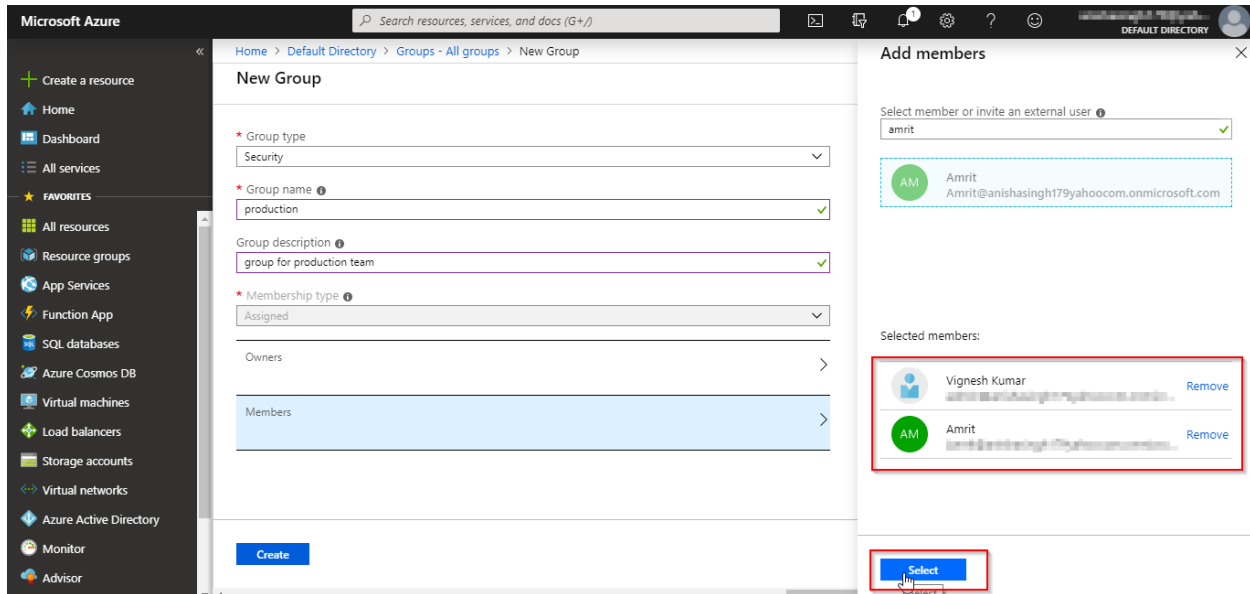

**Problem Statement:** Create a basic group and add members

**Solution:**

**Step 1:** Sign into the [Azure portal](#) and search for Azure active directory in search bar, select groups from the left side menu and then click on “**New group**” option.

**Step 2:** Fill in all the mandatory fields then select members. Search for members in the drop down if you need. Then click on select to add the members.

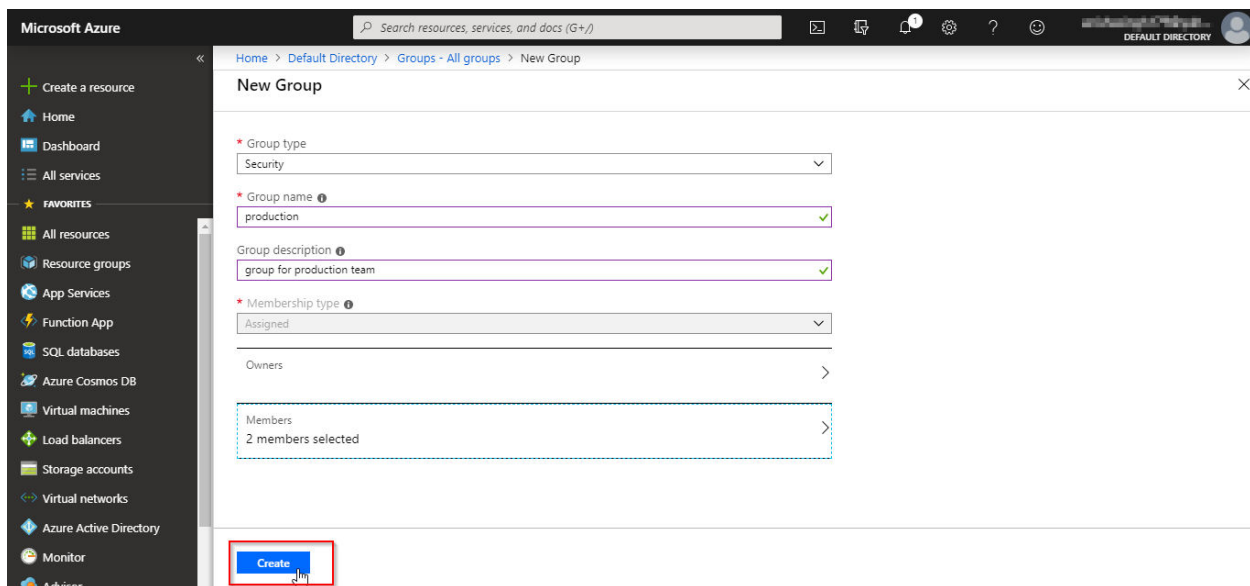

The screenshot shows the Microsoft Azure portal interface for creating a new group. The 'New Group' form is filled out with the following details:

- Group type: Security
- Group name: production
- Group description: group for production team
- Membership type: Assigned

The 'Add members' panel is open, showing a search for 'amrit' with a dropdown list of results. The 'Selected members' list shows two members: Vignesh Kumar and Amrit. The 'Select' button is highlighted with a red box.

**Step 3:** Once all the information is filled, click on create to create the group.

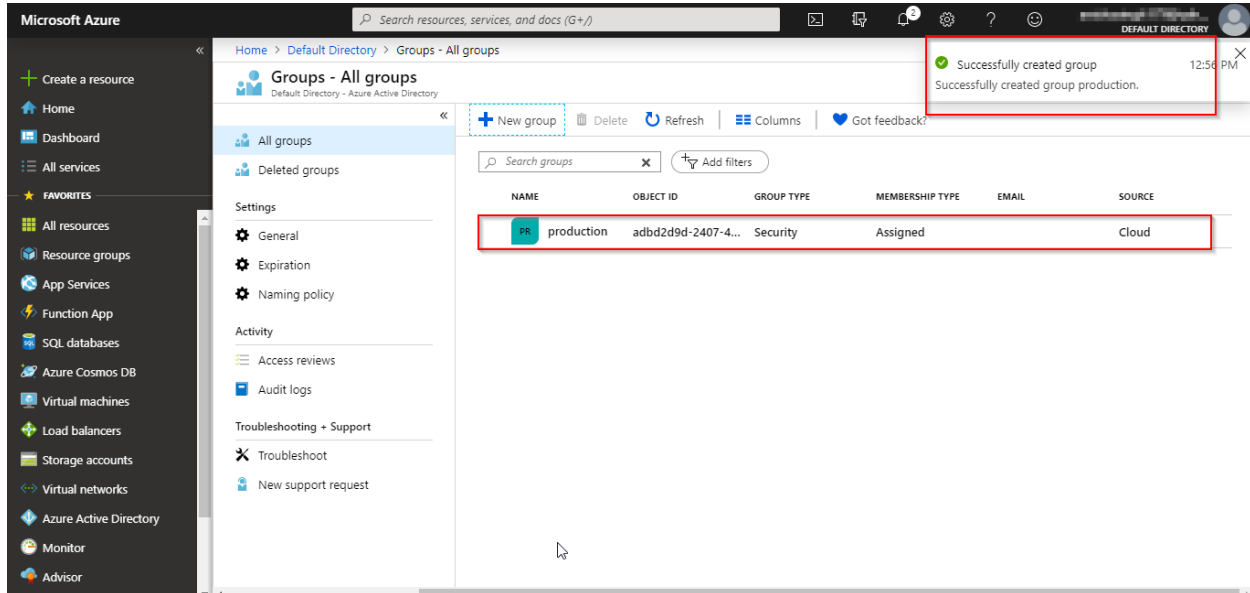

The screenshot shows the Microsoft Azure portal interface for creating a new group. The 'New Group' form is filled out with the following details:

- Group type: Security
- Group name: production
- Group description: group for production team
- Membership type: Assigned

The 'Members' field now shows '2 members selected'. The 'Create' button is highlighted with a red box.

**Step 4:** The group will be created and you will be able to see it listed in the groups page.

Microsoft Azure
