 <p>No route tables to display</p> <p>Create a route table when you need to override Azure's default routing. For example, you can route traffic to a network virtual appliance or to your on-premises network for inspection. A route table contains routes and is associated to one or more subjects. <a href="#">Learn more</a></p> <p><a href="#">Create route table</a></p>			

**Step 3:** Enter data and click create.

Home > Route tables > Create route table

## Create route table

You can add routes to this table after it's created.
